

# Australian National Total Body PET Facility

## Onboarding

## Planning

## Execution

## Completion

### Expression of Interest

Reach out to **Sydney Imaging** to express your interest for a new project in the Total Body PET Facility

### Discuss project feasibility

Prior to submitting a new project for consideration discuss with the **NIF Fellow** the feasibility, timeline and requirements of your project

### Submit project for endorsement

Submit a **brief project description** via the TBP Research Portal. All proposals will be reviewed by a **Scientific Review Panel**

### Regulatory and compliance

Obtain **ethics** and other **regulatory approvals** for the project (e.g., insurance, resourcing)

### Project registration

Project details are registered on the **Facility Management Booking system** and project becomes active

### Planning and scheduling

Confirm and implement **acquisition protocols**. Schedule **imaging dates** and radiopharmaceutical deliveries

### Imaging

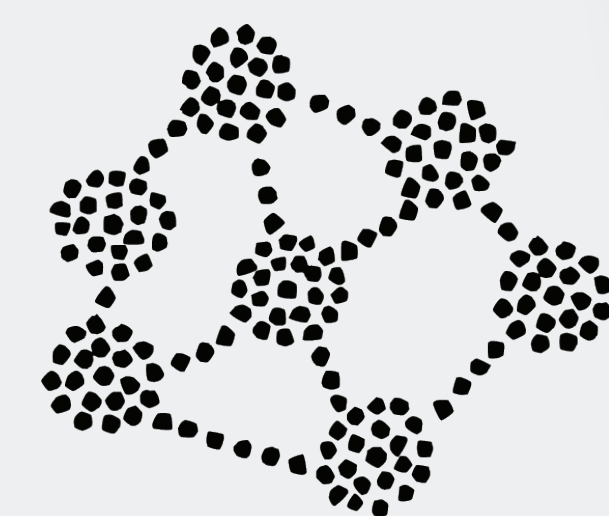

Patient reception, briefing and consent. Radiopharmaceutical **administration** and **imaging** session on the Total Body PET system

### Data analysis

Image **reconstruction** and data **analysis**. Data transfer and management

### Research Outputs

Report the **outputs** of the research project as appropriate (e.g. publications, patents, etc)
